

Simple, scientific, impactful.

nudgeplus is looking for **Field Coordinators & Field Enumerators** to support data collection at **Lombok** and **Pandeglang**.

Role: Field Coordinator and Field Enumerator

Duration: Training will take place once or twice in January, followed by field data collection from around February to March. This will involve the distribution of payment-based questionnaires, with approximately 10 positions in Pandeglang and 10 positions on the island of Lombok.

Compensation: Approx. 50,000.00 per respondent/questionnaire.

Deadline: 8 Januari 2024

Who are **nudgeplus**?

nudgeplus (www.nudgeplus.net) is the pioneer of nudge services in Indonesia. **nudgeplus** is established to meet a huge demand in hacking notorious behavioural problems in Indonesia with the backing from the fast-growing development of behavioural science in the world. Our goal is to narrow the gap in knowledge of behavioural science and help public and private institutions, as well as non-profit organisations, to change their stakeholders' behaviour through RCT (research, consultancy, and training). **nudgeplus** is a multidisciplinary team with a good mix of people from Behavioural Economics, Psychology, Engineering, Data Science, etc.

nudgeplus is supported by a trained professional by World Bank and other top-level behavioural science institutions. **nudgeplus** also collaborates closely with the IBEF (Indonesia Behavioural Economics Forum) which consists of Indonesian scholars who studied behavioural science in the top-level universities in the world.

What are we currently doing?

Currently, **nudgeplus** is in partnership with Yayasan Plan International Indonesia (YPII) to conduct research on social behaviour change communication among families of BKB EMAS members or families with toddlers. We are looking for *field coordinators* and *field enumerators* to collect pre-determined data from families of BKB EMAS members or families with toddlers.

In mid of January, the selected field coordinators and enumerators will help to recruit respondents for qualitative stage and receive training from **nudgeplus** and Yayasan Plan International Indonesia. In February to March, the field coordinators and enumerators will go directly to the designated remote (rural) areas to conduct data collection. During this process, the field coordinators and enumerators will work closely with the **nudgeplus** team and coordinate with YPII to ensure a smooth data collection process and the achievement of the project objectives.

What do we ask you to do?

Field coordinators

- Coordinate with the field team and **nudgeplus** team in collecting data from day to day (collection formats and channels will be provided).
- If necessary, conduct door-to-door surveys to look for and interview family members who fit the target population (target population and interview form will be determined).
- Ensure the enumerator to meet the target of interviewing 2-3 respondents per day.
- Conduct data quality control.

Field enumerators

- Conduct door-to-door surveys to look for and interview family members who fit the target population (target population and interview form will be determined).
- Meet the target of interviewing 2-3 respondents per day.
- Collect data from day to day (collection formats and channels will be provided).
